

What is *TN* *ITS*

15.03.2017

Stephen T'Siobbel – President TN-ITS

The data chain in a nutshell

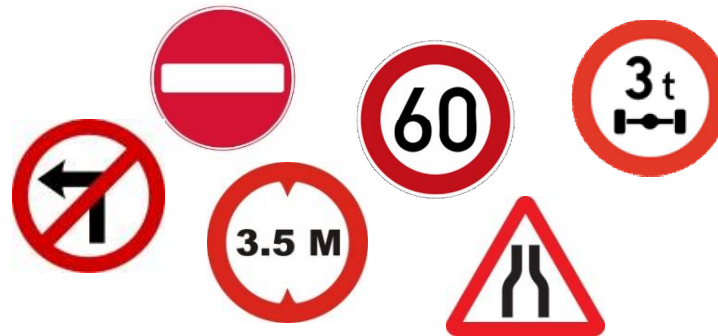

Why?

**TN-ITS helps road users get fresh map data
from the road operators to the vehicle's navigation system**

Linking road
authorities and
mapmakers

Creating a
seamless road
data value chain

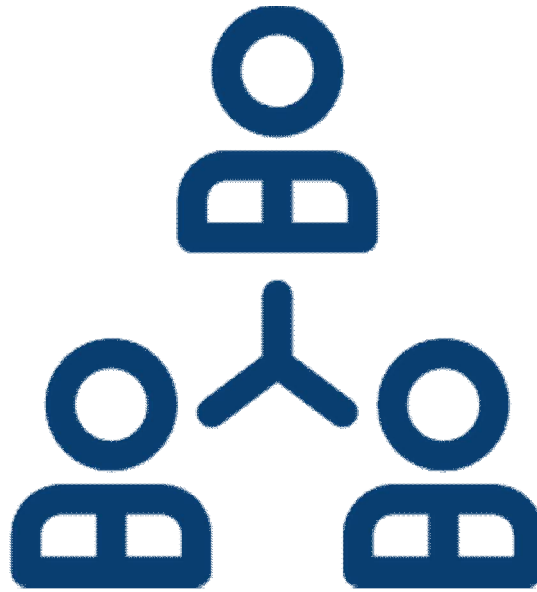

Providing
reliable, accurate
road data to
drivers

How?

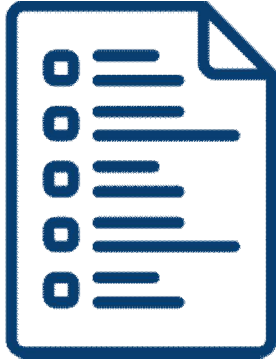

By bringing together
relevant stakeholders

By supporting EC policy via the
ITS and INSPIRE directives

→ to share effectively any changes to the static road data
and ensure a seamless data chain

What?

Standardisation

Define & maintain TN-ITS specifications in CEN/TC 278 WG7

Implementation

Provide guidelines, tools and services to support implementation in **Belgium, Finland, France, Ireland, Norway, Sweden, and United Kingdom.**

Who?

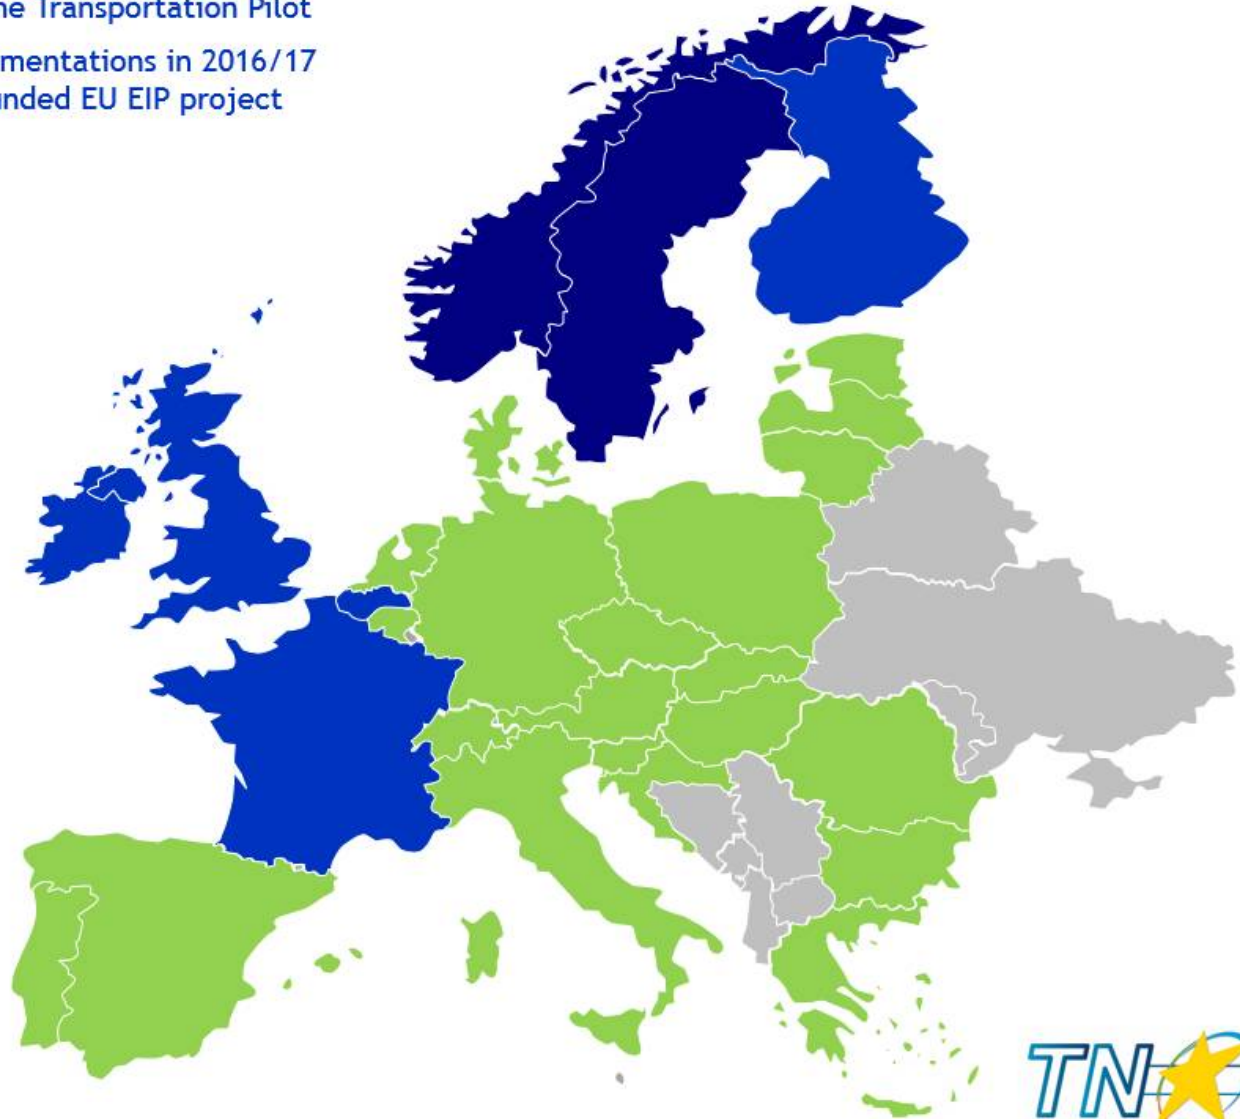

Deployment status?

Dark blue: TN-ITS implementations done in 2014/15 in the Transportation Pilot

Light blue: TN-ITS implementations in 2016/17 in the CEF-funded EU EIP project
